

CIEL question on finance study

Thanks for the information, I would have a couple of questions about the last study that was presented.

The first question is in relation to the scope of the study. Of the funding that was considered in the study, can you please clarify funding for what? Were there any criteria to decide to include the funding in the scope or not.

My second question is whether the different types of funding (grants Vs Loans Vs Equity etc...) are identified in the study.
