

On Item 5:

- Analyzing the document (AHG/2018/1/3) it is noted that there is more regulation the waste stage than on product level.
- At global level a broad range of instruments are mentioned, but was is missing are international platforms where also private sectors is included such as SAICM, this should be added to the list.
- In general on regional and national level there is not much attention for waste in rivers. Rivers are an important pathway for marine litter to oceans and seas. This lack should be addressed.
- It is important to identify critical success factors, if these can be made specific that could be used for the discussion under item 8
