

Uganda Delegation on Sequencing

Thank you Mr. Chair

The Ugandan delegation aligns itself to the statement delivered by Senegal on behalf of the African Group.

In order to make progress in the negotiations, our delegation suggests that the work can be organized along two tracts, that is, the substantive matters such as the scope, core objectives, core measures, and the other on means of implementation and other general provisions. However, in order not to strain particularly small delegations, we suggest that there should not be more than two contact groups running at time.

To ensure inclusiveness during the negotiations, we emphasize that there is need to support participation of at least two delegates per member state, particularly from developing countries.

We believe that progress can be further enriched by intersessional work, including regional consultative meetings, where possible.

Considering the time and resource constraints, we emphasize that the stakeholder consultations should not encroach on valuable time for the negotiations.

I thank you Mr. Chair
